the ones written in **bold** are the ones to be added, and then hier a list to be erased, rules to be the deleted:
rules to be deleted:

au = oi
g at the end = k
st = sht
st at the end = st
sp = shp
er = ar
d at the end = t
b at the end = p
pf = f
hr = ar
er = ear
h = 0

++++++++++

this sign : **sch** has to have priority above any other rule.
Sch = sh

I found when taken first the sign ch = j and after applied the sign
ss = s it takes to a wrong result

For example hier

ausschlag - [oisjlak]
ausschmückung - [oisjmukunk]
ausschreibung - [oisjraibunk]
ausschuss - [oisjus]
ausschuß - [oisjus]
ausschweifung - [oisjvaifunk]

the result should be

ausshlag
ausshmukung
ausshraibung
ausshuss
ausshvaifung

****thank you
